1. Overview of BITCOIN FUTURE (BITCOIN)

Cryptocurrency has been around for more than 10 years, but it has not been applied to life yet. We still haven't used any cryptocurrency to buy goods and services in real life. Mainly cryptocurrencies are used for trading on exchanges, Or used in many technology projects such as: Defi, Metaverse, NFT, Game...

So why has it been more than 10 years that cryptocurrencies have not been used in life?

The first reason: High transfer fee.

BITCOIN transfers cost up to \$30-50/Transaction, Token transfers on the Ethereum network cost \$10-\$30/Transaction. Or Token transfer transactions On the Tron network, cost is from \$ 0.8 - \$ 1.

With such transaction costs, it is very difficult to apply in life. You can't buy a bunch of vegetables or a bottle of mineral water and pay a transaction fee like that.

In addition, the transfer speed is sometimes slow and congested.

BITCOIN is 7 Transactions/sec, Ethereum Network: 14 Transactions/Second, Tron Network is 300 Transactions/sec

2. What is BITCOIN FUTURE (BITCOINF)?

Why BITCOINF is the best solution to apply in life?

What is BITCOINF?

BITCOINF Is a product of technology developed on the blockchain (Blockchain), Used as an intermediary in the exchange of goods and services between Merchants and Consumers.

BITCOINF Stored in all the most popular wallets used globally such as: Bitget Wallet, MetaMask, Trust wallet , U2U, etc Or all wallets that can allow new Blockchain networks to be added into Wallet

Why is BITCOINF the best solution to apply in life?

BITCOINF use on Blockchain
With super fast speed up to

100.000

Transactions/Second

Transaction fee for transferring
BITCOINF from one wallet to
another is super cheap

0,0000025\$

Transaction

This means with just \$1 you can make 400,000 Transactions

So it can be said that the transaction fee is very low. You can make all transactions, and exchange goods & services in real life, With having to spend low transaction costs.

3. Needs of Merchants and Consumers

Airline Website: BITCOINF.ORG - BITCOINF.NET

Merchants want to have many customers & sell goods quickly

Consumers want to buy quality products at the best price

Merchants' needs

After the crisis of the global pandemic, many businesses have gone bankrupt or laid off employees, and many stores have to close and no longer operate. Merchants faced many difficulties in selling, goods were backlogged.

In order to sell goods, Merchants have to apply many types of advertising on media channels, social networks, and through many intermediaries, the cost has been very high when reaching consumers.

Or when the goods are consigned to the big supermarkets, it takes 2-3 months for Merchants to receive the money, the Supermarkets have sold the goods, and then they have to pay the Merchants. In addition, the discount is also very high, There are products up to 50% - 60%.

With BITCOINF, we create a huge community and Merchants sell directly to consumers without having to go through intermediaries. Merchants also don't need to spend on advertising and marketing anymore. At BITCOINF we have created a lot of marketing tools to connect Merchants and consumers absolutely free.

So instead of having to pay for a lot of advertising, marketing, and intermediary costs, Merchants can completely cut it all out to direct consumers.

Demand of customer

With the BITCOINF project, we have brought great benefits to consumers. Consumers can buy goods directly from manufacturers without paying intermediaries. Thus, the goods are both of good quality and at a very good price.

For example, there are many clean food products sold in the BITCOINF community.

Example: A Salted Chicken outside the market sells for 10\$, But here customers only pay for 50% Cash + 50% Exchange in BITCOINF.

That means paying 5\$ + 125,000 BITCOINF (1 BITCOINF = 0.00004 \$).

With BITCOINF, Consumers are given away by us for free.

4. Trend of application of Cryptocurrency in life

In the future, the application of cryptocurrencies in life is an inevitable trend.

The development process of money, we can generalize as follows.

The first is **the exchange of goods for goods**. For example, I can raise a chicken and you can make a cloth and wait for the market to meet to exchange.

Next, the society developed, people used **coins** in transactions

Then society really changed when people invented **paper money**

When internet banking was born, people gradually switched to using **money transfers via the Internet**. Imagine that before buying a house or a car, people had to carry sacks of money, but today just need to transfer to internet banking, and the transaction can be done immediately.

Social development creates convenience for consumers. The trend of not using cash but using e-wallets has become familiar. In China, up to 99% of transactions are done via **WeChat pay, or Ali pay**. In Vietnam, there are gradually many shops and services that accept **VNPay, Zalo Pay, Momo...**

After the period of using e-wallets, in the future, people will use wallets containing **cryptocurrencies** for trading, which is an inevitable trend.

5. BITCOINF Development ROADMAP

STATE 1

April-May-June 2022

- Brainstorming ideas
- Create BitcoinF Smart Contract
- Looking for a companion team
- Recruiting core personnel
- Building Project Website
- Prepare the development platform

STATE 2

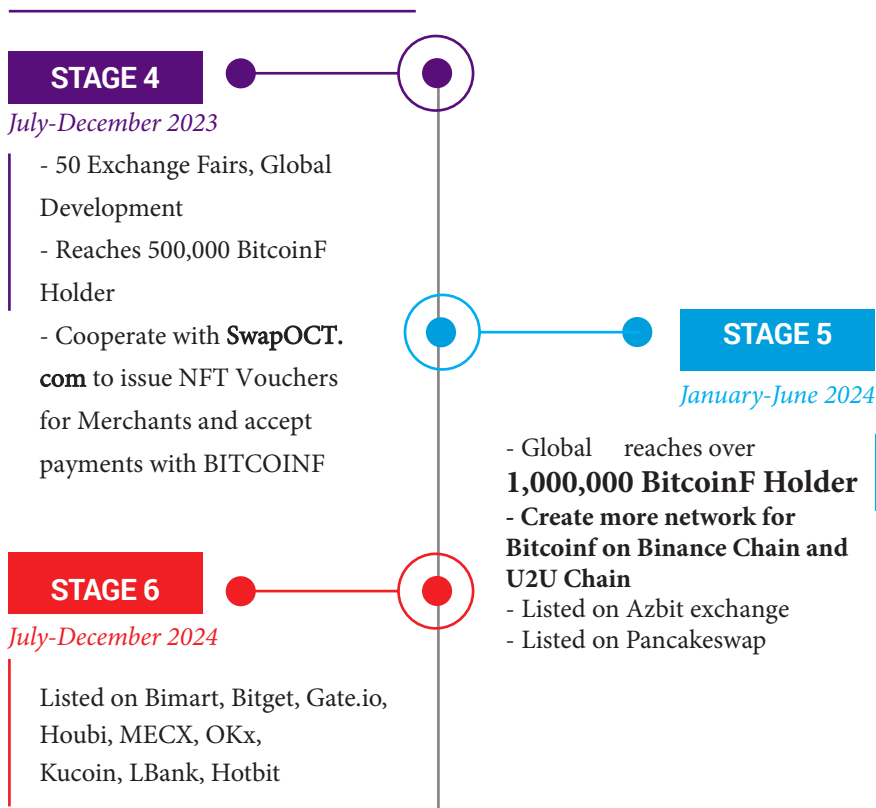

July-December 2022

- Building E-Commerce Platform BITCOINF.NET, Exchange with BitcoinF
- Developing Social Networking channels such as Tiktok, YouTube, Facebook, Twitter, Telegram EN, Telegram EN Channel, Zalo, Viber, Zoom, Event, BitcoinF consultation & transaction place

STAGE 3

January-June 2023

- KOL, Tiktok, YouTuber, Facebook Group, Media, Event, Transaction place, reached 100,000 BitcoinF Holder Listed on the 2 largest Cryptocurrency sites in the world: Coinmarketcap, CoinGecko

6.Initial results:

BITCOINF Is a completely different project from all the projects that you have seen before.

The first difference is that BITCOINF is the first project in the world to apply cryptocurrency and life.

The second difference is that BITCOINF is free and immediately paid to wallet in your phone, then you can use BITCOINF to shop and exchange goods immediately.

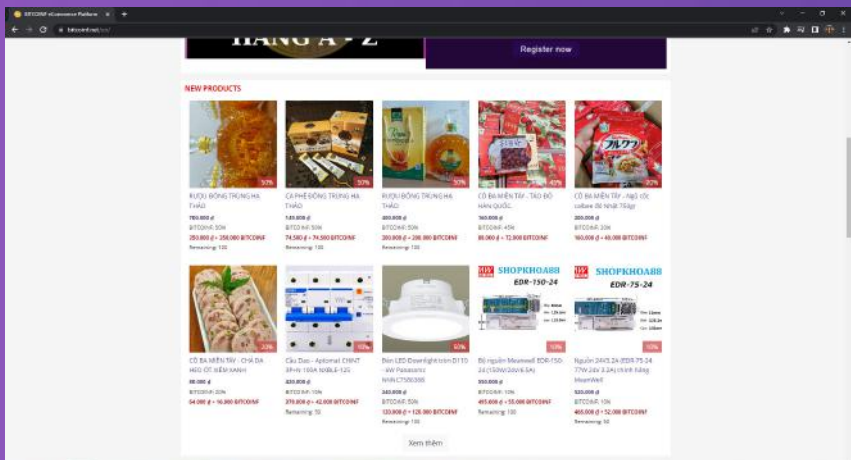

Bitcoin Future (BITCOINF) has Total Community of over 1,000,000 Members of 180 countries around the world

have already registered on on Bitcoinf.org with Official confirmation, over 500,000 Holders.

- E-commerce website BITCOINF.NET Exchange goods by BITCOINF has officially run.
- Organize dozens of commodity transaction places with BITCOINF
- Organize 10 Big BITCOINF shopping fairs
- Dozens of OPP presentations to present for newbies about BITCOINF
- Dozens of Merchants Zoom sessions with the consumer community to exchange with BITCOINF
- Dozens of Group BITCOINF Sales on Zalo and Facebook.
- Registered and Listed to 50 Popular Crypto Sites
- In process of audit review and approval on CoinMarketCap and CoinGekco
- In discussions with many exchanges to plan to list the Exchange at the end of 2024.

Let's join hands to strongly spread the value of BITCOINF, so that we can achieve great results together.

7.Value creation activities for BITCOINF

Shopping fair program, Exchange of goods by BITCOINF

At this fair you will meet Merchants directly and shop & exchange goods right there.

There are many items Merchants exchange up to 100% By BITCOINF.
The fairs will be held monthly or quarterly.

A place to exchange goods with BITCOINF

Thousands of places to trade, introduce products, accept exchanges with BITCOINF built everywhere.

Exchange of goods by BITCOINF on Zalo & Facebook

Zoom sessions to share about the BITCOINF project for the community, Merchants Zoom sessions introduce their products to the community and exchange with BITCOINF.

8. Understanding the Cycle of the Cryptocurrency Market

Bitcoin As the first cryptocurrency in the world born around 2009, Every 10 Minutes the miners create a Block containing 50 Bitcoins, every 4 years, Bitcoin Halving, the number of Bitcoin Rewards of the mined Block is reduced by half

Before 2012 the number of rewards for miners when they mine a new Bitcoin block was 50 Bitcoins, In 2012 was the first Halving, Mining amount was halved to 25, By 2016 it was only half is 12.5, in 2020 it will be 6.25. From 2024, there will only be 3.125 Bitcoins for each Block.

The number of mining less and less makes Bitcoin more and more valuable. It becomes a store of value.

Bitcoin was born first in the world, so it is most known by many people, it is considered the king currency.

All later cryptocurrencies follow the price of Bitcoin up and down.

Starting when Bitcoin was listed on the exchange for \$0.00076, and 11/2012 was the first Halving, Bitcoin started to increase sharply, Peak in 12/2013 Bitcoin price increased to 1,131 usd, Pulling the whole world. The cryptocurrency market cap reaches over \$200 billion.

2014 Bitcoin price started to go down and in 2015 it bottomed out. 7/2016 Bitcoin Halving, Bitcoin Price Starting to grow again until December 2017, the Bitcoin price peaked at \$ 19,497 Dragging the market capitalization to \$ 1,200 billion.

2018 Bitcoin price started to go down and 2019 bottomed. 5/2020 Bitcoin Halving, Bitcoin Price Starting to grow again until 11/2021, the Bitcoin price peaked at \$ 69,000 Dragging the market capitalization to nearly \$ 3,000 billion.

So it can be seen that, after reaching the top, the price of Bitcoin begins to go down and the following year, it will bottom. Bitcoin price increased again in the year of Bitcoin Halving, 1 year after the halving, Bitcoin price reached an all-time high.

According to this cycle, Bitcoin price will go down in 2022, And it will bottom in 2023, Bitcoin will grow again in Bitcoin Halving 2024, and peak All-time high in 2025, capital drag Cryptocurrency market capitalization is around \$8,000 - 10,000 Billion dollars.

Bitcoin Future (BITCOINF) With the desire and aspiration to become the Bitcoin of the future. In the 2 years 2022-2023 is the time when Bitcoin and the entire crypto market go down, This is also the golden time for BITCOINF to build value. It is expected that BITCOINF will be listed on major exchanges in early 2024, When the entire global cryptocurrency market starts to grow again, BITCOINF will also grow. In 2025 Bitcoin price peaks, then BITCOINF target is 1 BITCOINF = 0.00004 \$

Do you see this cycle? What have you prepared for the coming huge wave of global cryptocurrency growth?

BITCOINF is airdropped to your wallet for free, so you can use it to shop and exchange goods right away. Have you seen such an opportunity in the world?

BITCOINF Will help you make your dreams come true, so why doesn't you appreciate this opportunity?

At this time, BITCOINF is still a great opportunity for you, Please appreciate and seize this opportunity immediately.

Let's spread the word so that we can create things that the whole world must admire.

9. Seize the opportunity to own BITCOINF

With BITCOINF We build a development strategy that gives you many opportunities to own BITCOINF.

Ways to get Free BITCOINF:

Register on BITCOINF.ORG website: Get Free 10,000,000 BITCOINF

Share Your Affiliate Link Get Free BITCOINF equivalent to the person you refer (withdrawal order on the web 24-48 hours)

Join the Reff Emulation Program on the website

Sell product on BITCOINF.NET e-commerce site and accept BITCOINF

Get BITCOINF in paid platform

Buy BITCOINF from Pancakeswap, SwapOTC.com/pools, Azbit exchange

10. BITCOINF Growth Potential

Based on the growth of the consumer community and the Merchants community, which means that BITCOINF grows in value.

Specifically, the Development Plan will be:

- Get Free BITCOINF & Get Paid BITCOINF
- Add value to BITCOINF by exchanging it with Merchants' NFT Vouchers on **SwapOTC.com**

-
- Connecting merchants that accept exchange by BITCOINF
 - Listing on major global exchanges.

Because BITCOINF is immediately received in your wallet, you can transfer it to others who need it at any time.

You can also participate with a short-term mindset to create short-term profits or long-term for the purpose of long-term wealth accumulation.

BITCOINF will develop according to the price growth, we hope that when listed on the exchange, target price as expected

1 BITCOINF = \$0.00004

The success of BITCOINF depends on the cooperation of all communities, contributing to spreading and sharing value for BITCOINF.

When Shiba Inu was listed on the exchange, the bottom price compared to the peak price increased by more than 1,000,000 times.
